

Yuta Yanagisawa

Full-Stack Web Developer

Summary

Adaptable professional web developer with 2.5+ years of experience and a proven knowledge of web application development, website architecture, and web platform development. Designed and developed over 10 advanced web applications both backend side and frontend side from use cases and functional requirements with different frameworks and language (mainly Java). Seeking to leverage my technical and professional experience and expertise to provide impact to the team and grow more as a developer.
